

RECORDING STUDIO SUB-MIX HEADPHONE AMPLIFIERS

Individual Headphone Level Control for Voice-Over Talent or Musicians

Description:

The RDL DS-SH1 Stereo Headphone Amplifier allows talent to adjust the level of their own headphones. In this example, the recording console is providing sub-mix feeds to each monitor location. The headphone amplifiers have individual volume controls and deliver more than 50 mW to either high or low impedance headphones. The DS-SH1 output is a durable metal 1/4" (6.3 mm) headphone jack. The DS-SH1M is available with a mini-jack output.
