

PHONO PREAMPLIFICATION

Interface a Turntable to Audio Equipment with Line Inputs

EZ-PH1
Phono Preampifier

Description:

This application illustrates how to interface a turntable with common audio equipment not equipped with phono inputs. The EZ-PH1 is a compact phono preamp that produces an unbalanced stereo output using the RIAA equalization curve. Input and output connections are made through gold-plated RCA jacks for easy connection to an amplifier auxiliary input or a CD recorder line input. Gain trimmers for each channel and dual-LED VU meters make it easy to set preamp levels. The EZ-PH1 is the ideal solution for phonograph record playback or dubbing. A grounding screw is provided for connection to the tone arms of quality turntables.

The EZ-PH1 is shipped with a high efficiency power supply that connects to a locking dc power jack.
