

SWITCH MULTIPLE STEREO AUDIO SOURCES

Monitor Audio Outputs with Intergrated Headphone Amplifier

EZ-HSX4
Stereo Audio Input Switcher
with Headphone Amp

Description:

The EZ-HSX4 has an integrated headphone amplifier that adds versatility to the four input stereo switcher. The EZ-HSX4 uses solid-state switching to insure reliability and so that mechanical switch noise does not affect signal quality. The front-panel headphone jack monitors the line-level output which may be used to feed sound systems in different rooms or to feed recording equipment. If the line output is not used, the EZ-HSX4 can serve as a headphone amplifier with four switched inputs. The line-level stereo output can be switched to unity (fixed) gain or can follow the level set by the front-panel volume knob that adjusts the headphone output level.

The EZ-HSX4 is shipped with a high efficiency power supply that connects to a locking dc power jack.
