

MEETING ROOM MIXER WITH NO SETUP REQUIRED

Remote Controlled Mixer Provides User Adjustment in Multi-Purpose Space

Description:

The RDL FP-TPX3A Remote Controlled Mixer makes setup easy for a wide variety of uses in this hotel meeting space. A visit to the AV closet is *not* required when shifting from one use to the next.

The three FP-TPX3A inputs are fed from any of the Format-A twisted pair senders. Each Format-A input module provides one balanced microphone input. (Line-level Format-A input modules are also available.) The three input modules are chained together and connected to the mixer using standard twisted pair cable with RJ45 connectors. A separate twisted pair cable connects the D-RC3M Remote Mixing Control to the mixer. The D-RC3M provides a separate level control and mute button for each of the three inputs. The wall mounted control is simple to use and easy to understand even for facility users with no technical background.

The FP-TPX3A provides a solution for flexible use of multi-purpose rooms that does not require technically trained staff for setup.
