

**Description:**

The background music (BGM) audio for the retail store is connected to an ST-VCA3 Voltage Controlled Amplifier that is controlled by an DS-RLC3 Remote Level Control. The DS-RLC3 features 4 preset levels, set by the installer, providing the retail staff with 4 different volume choices to accommodate varying ambient audio levels. The DS-RLC3 is mounted in a single gang box with an RDL CP-1S Stainless Steel Cover Plate.

The audio from the ST-VCA3 is routed to the FP-PA35A Power Amplifier with Power Supply which powers the overhead speakers in the store. The FP-PA35A features an integral audio compressor that controls clipping.

Parts List

Product	QTY
CP-1S	1
DS-RLC3	1
FP-PA35A	1
ST-VCA3	1

Recommended Pwr. Supplies

Product	QTY
