

REMOTE SWITCHING OF SPEAKER-LEVEL SIGNALS

Noise Mitigation at an Outdoor Restaurant Patio

Description:

At this restaurant, the outdoor patio loudspeakers are required to be turned off when no customers are seated there. The ST-LCR1H High Power Logic Controlled Relay is capable of switching up to 500 W of amplified audio. The D Series-RT2 Remote Control Selector is used to operate the ST-LCR1H from a secure location. The ST-LCR1H connects or disconnects the outdoor speakers. The D-RT2 provides visual ON and OFF indication of the outdoor speakers.
