

AUDIO EQUALIZATION ENHANCES VOICE INTELLIGIBILITY

Adjustable Equalization Optimizes Paging Signal to Workplace

Description:

The ST-EQ3 3 Band Equalizer shown in this paging system tailors the system for voice-band intelligibility. The midrange control boosts the voice band (200 Hz to 7 kHz). Low and High band controls attenuate audio frequencies outside of the voice band. The center frequency of each of the three bands may be adjusted by +/- 12 dB.

Note: The ST-EQ3 is a cost-effective module to enhance a variety of systems including adjustable "loudness" equalization for music in PA applications.

Parts List	
Product	QTY
ST-EQ3	1
