

Description:

This system gives the security office the ability to monitor and record audio from the remote monitored location. The STM-LDA3 Microphone Preamplifier feeds both a stereo recorder and a monitor amplifier at the monitoring location. The very low noise of the studio-quality preamplifier allows operation at a high gain to pick up sound in the monitored area without excessive background noise. The 2 Watt amplifier feeds a single 8 Ω speaker in the security office. The DS-RLC10K volume control gives the user the ability to adjust the volume as needed. The wall control is available in RDL standard white/gray, black or in stainless steel (pictured).

Parts List	
Product	QTY
DS-RLC10K	1
STM-LDA3	1
ST-PA2	1
ST-VCA3	1
