

CONSUMER TO PRO AUDIO FORMAT CONVERSION

Stereo Unbalanced Audio Source Connects to Stereo Balanced Mixer Input

Description:

A portable podium is frequently used for presentations in this room. An ST-UBA2 Unbalanced to Balanced Line Amplifier is installed in the floor box to convert the unbalanced stereo audio signal from a laptop computer or other consumer source to match the balanced stereo inputs of a professional mixer. Each channel is provided with installer-adjustable gain and a Dual-LED VU meter to simplify adjustment. A summed mono output is also available. The small size of the ST-UBA2 permits it to be comfortably installed in a floor box.
