

SWITCHER SELECTS STEREO AUDIO SOURCE

Local Momentary Pushbuttons Provide Silent Soft-Switching of Four Consumer Audio Sources

RU-ASX4D
Stereo Audio Input Selector

Description:

The RU-ASX4D Audio Selector allows the user to select one (or none) of four stereo consumer audio sources to feed the power amplifier. Long-life keyboard-style momentary pushbuttons activate silent solid-state audio switching circuits. The active source is quickly ramped up when it is selected, providing an aurally pleasant switching transition. Solid-state switching results in years of reliable operation free from switch noise and intermittent connections common to many inexpensive unbalanced audio switchers.

Each RU-ASX4D input may be balanced or unbalanced; the RU-ASX4D may be remote controlled.
