

FORMAT-A SOURCE SELECTOR & IN-WALL AMPLIFIER

Distribute Three Audio Sources to Multiple Locations Over UTP Cable

Description:

Three styles of music are distributed to various rooms in this facility over CAT 5 cable by an RU-TPS4A Format-A Active Sender / Distributor. A D Series-TPRX3A Source Selector, D Series-PA3 Audio Amplifier and D SERIES-SP1A 8 Ohm loudspeaker installed in each room allow the occupants to listen to any of the three types of music provided or to listen to their own program material simply by plugging their MP3 player into the front-panel input on the D-PA3 amplifier. The front-panel local input overrides the distributed audio. The D-SP1A loudspeaker provides rich detailed sound in a compact Decora compatible format.
