

3 SELECTABLE MUSIC CHANNELS

Audio Distribution with Source Selection and Local Decora-Style Active Loudspeaker

Description:

Three styles of music are distributed throughout this office complex over a combination Dante™ audio network and RDL Format-A distribution. An RU-NFD Network to Format-A Interface/Distributor is used to convert the networked audio sources to Format-A. Audio and power is supplied to a source selector and active speaker in each office through a dedicated CATx cable. A D-Series-TPRX3A Source Selector and a D-Series-PSP1 Active Loudspeaker installed in each office allow the employees to listen to any of the three types of music.
