

AUDIO BOOTH WITH AUDITION / CUE CAPABILITIES

EZ-HSX4 Provides 4 Additional Audio Inputs to House Mixer

EZ-HSX4
Stereo Audio Input Switcher with
Headphone Amp - 4X1

Description:

Live sound mixing often requires the use of recorded music or effects from tape, CD players, or other sources. Using the cue or solo options of the main mixer can result in inadvertent errors in the house mix. The EZ-HSX4 four input switcher provides a high quality headphone output which can be used for auditioning recorded audio sources. The EZ-HSX4 provides source selection between four additional audio sources without dedicating additional channels on the main mixer to sources that are seldom used. Any of the sources switched by the EZ-HSX4 can be cued or auditioned without operating the main mixer. This compact EZ series product will extend the functions of any live sound mixer.

The EZ-HSX4 is shipped with a high efficiency power supply that connects to a locking dc power jack.
