Power Inserter - Twisted Pair - 1 set of outputs - Signal loop-through

DS-TPS8A
Active Two-Pair Sender
Twisted Pair Format-A
Mini jack input

DS-HA1A
Format-A Stereo Headphone Amplifier

DS-TPA1A
3.5 W Audio Power Amplifier

Description:

Each office is equipped with two active stereo audio inputs that may be listened to via the overhead loudspeaker or through headphones. The local computer is connected to one input. The other input is available for a user-supplied playback device, such as a Personal Media Player used for dictation, recorded meeting playback or music. Software alerts enabled on the computer will be heard along with the Personal Media Player playback because both audio inputs are active at all times. Confidential playback content remains private by turning off the overhead speaker and using the headphones powered by the DS-HA1A Stereo Headphone Amplifier. Computer or Personal Media Player audio suited or intended to be heard in the whole office may be amplified to an appropriate listening level by the DS-TPA1A 3.5 W Audio Power Amplifier.

Parts List	
Product	QTY
DS-HA1A	1
DS-TPS8A	2
