

NEAR FIELD MONITORING OF SELECTED SOURCE

Courtroom Judge Selects from Three Sources to Feed Active Loudspeaker

Description:

The D SERIES-PSP1 Decora-Style Active Loudspeaker is ideal for use as a near field monitor in courtrooms, legislative chambers and conference facilities. In this courtroom the three main microphones, Prosecution, Defense and Witness, feed the courtroom's audio system. Each mic source is preamplified to line level and fed into a TX-TPS3A Format-A three-pair sender which sends the three signals to the judge's bench over UTP cable. A D-TPRX3A three-pair selector receives the audio; the judge selects the desired source via the front-panel pushbuttons. The D-TPRX3A selector is mounted in a DC-2W two gang Decora desktop chassis along with a D-PSP1 active loudspeaker equipped with a front-panel level control.

Parts List		
Product		QTY
D-PSP1		1
D-TPRX3A		1
TX-TPS3A		1
DC-2W		1
