

**Description:**

All audio processing in this meeting room is handled by a centrally-located Dante-enabled DSP. The RDL DD-BN22 Bi-Directional Mic/Line Dante Interface provides inputs for up to two microphones and analog outputs to feed the two portable active loudspeakers. Each XLR input provides three switches that are set from the front of the unit before the cover plate is installed. One switch enables or disables P48 phantom; the second switch selects the mic or line gain range; the third switch sets the gain. Rear-panel switches set each XLR output to mic or line level.

Parts List	
Product	QTY
DD-BN22	1
CP-2	1

Recommended Pwr. Supplies  
**Not required - PoE powered**
